# 01 Introduction

# Geospatial Analytics

Transforming a (potentially large) set of isolated facts about **when** and **where** objects/people/phenomena **were** or **moved** into higher-level knowledge:

- Summarizing complex events and phenomena
- Providing insights about the general structure (global view)
- Identifying specific interesting patterns (local view)
- Enable predictions or educated guesses

## EDITORIAL

**Editor's Opening Address.**  
**FR**ANKLYN D. WHITMAN, editor of the Dallas Dispatch, in his opening address at the annual convention of the Dallas Dispatch Association, held at the Hotel Sherman last night, said that the newspaper's greatest asset was its readership. He pointed out that the newspaper's success was due to the fact that it was a newspaper of the people, and that it was a newspaper that was interested in the people's interests. ## DALLAS OFFICERS HELP SHOOT DOWN PAIR IN LOUISIANA

**Arrested, La., May 21.**—The bodies of Clyde Barrow, southwest's most desperate gunman, and his companion, Bonnie Parker, lay in a morgue here today after they were killed in a battle with four Texas and two Louisiana officers.  
 The Texas officers, trained in west Dallas, were riddled with bullets from machine gun, rifle and shotgun fire. Both he and Bonnie Parker had each been shot 16 times or more.  
 The pair was ambushed early today in a trap Sheriff Schmidt of Dallas and his deputies had set for them six weeks ago. In the party of six officers who poured a stream of slugs into their bodies were Detectives Ted Hinton and Bob Abney of Dallas, Frank Hamer, former Texas ranger, and N. T. Gault, former Texas ranger and member of the state highway department, and two Louisiana officers.  
 The Louisiana rangers had been discovered by Sheriff Schmidt and several plans have been laid to trap them.  
 Both bodies were identified by the officers. A coroner's inquest held this afternoon said they had come to their deaths from "bullet wounds." The big use of Barrow, was missing, not off to himself to escape work while a prison farm convict.  
 The various versions of the gun fight was given by Frank Hamer.  
 "There wasn't much to it. We set a trap. They ran into it like a spring."

# Tracking the movements of dissidents

1970s-1980s

- Stasi sprayed a **radioactive solution** on the floors of the rooms where suspected dissidents met
- The solution adhered to dissidents' shoes, allowing agents to **track who attended a meeting** there
- Agents wore portable Geiger counters that activate when a suspected dissident was nearby

# Module 1: Spatial and Mobility Data

- Basic concepts
  - Geographic coordinates systems, Vector data model
- Data types
  - Trajectory, Flows, Tessellations
- Spatial and Mobility data
  - Mobile Phone Records, GPS traces, Social media records, POIs, Road Networks
- Preprocessing mobility data
  - Filtering, compression, stop detection, trajectory segmentation, trajectory similarity and clustering
- Practice: open-source tools for geospatial analysis
  - Shapely, GeoPandas, folium, scikit-mobility, osmnx, and more

## Module 2: Patterns and Laws

- Spatial analysis
  - point patterns, spatial autocorrelation, GWR
- Individual mobility patterns
- Collective mobility patterns
- Practice: analyze mobility data with scikit-mobility

## **Module 3: Predictive and Generative Models**

- Prediction
  - Next-location prediction
  - Crowd flow prediction
  - Spatial interpolation
- Generation
  - Trajectory generation
  - Flow generation
- Practice: mobility prediction and generation in Python

# Module 4: Applications

- Urban Segregation models
- Navigation Principles
- Estimating Pollution
