

# Esercizi

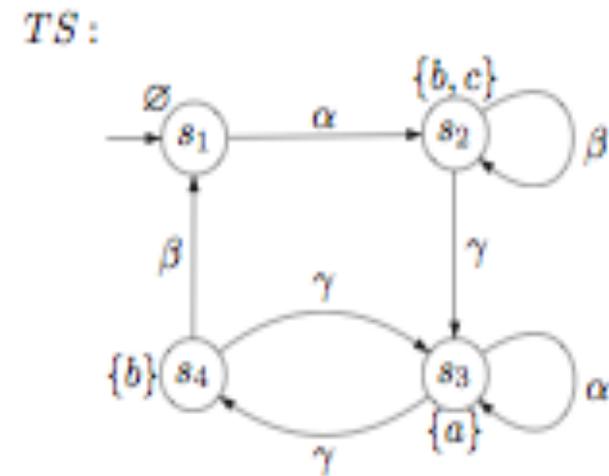

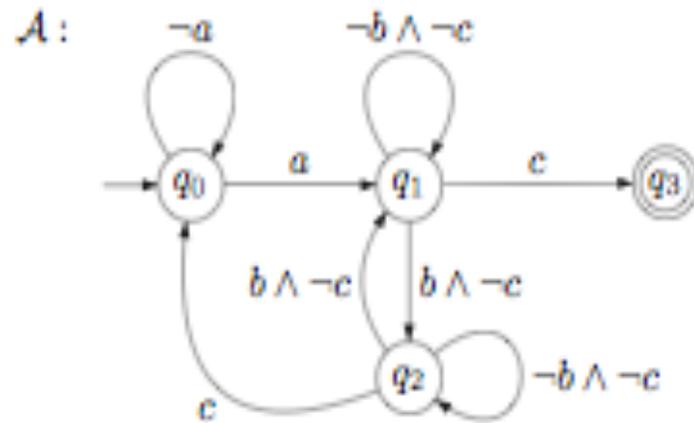

# GNBA vs NBA

Si consideri l'automa di GNBA descritto in figura (con stati di accettazione  $F1 = \{q1\}$ ,  $F2 = \{q2\}$ )

Costruire l'automa NBA equivalente.

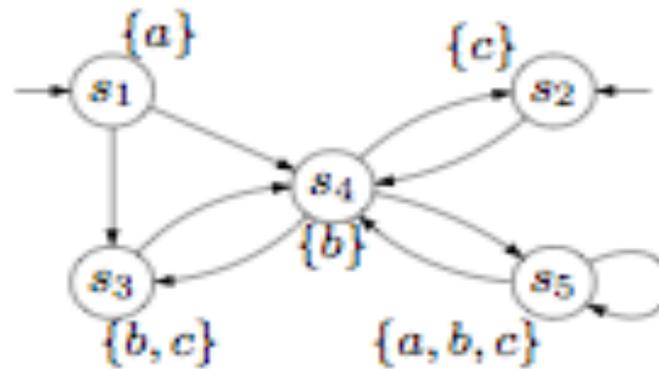

# TS X NBA

Costruire il prodotto  $TS \times A$

# LTL

Consideriamo il TS T definito in figura:

Determinare se  $T \models \phi_i$  dove

$\phi_1 = \langle \rangle [] c$

$\phi_2 = [] \langle \rangle c$

$\phi_3 = \text{next not } c \rightarrow \text{next next } c$

$\phi_4 = a \cup [](b \text{ or } c)$

# LTL

- Determinare la validita' (o meno) delle equivalenze
  - $[\ ] \text{ phi } \rightarrow \langle \rangle \text{ psi } = \text{ phi } \text{ U } (\text{psi or not phi})$
  - $[\ ] \langle \rangle \text{ phi } \rightarrow [\ ] \langle \rangle \text{ psi } = [\ ] (\text{phi } \rightarrow \langle \rangle \text{ psi})$
